

SMART FLEET MANAGEMENT

PRODUCT BROCHURE

fleetwave®

**Stay on track with smarter
fleet management**

chevinfleet.com

**Your fleet is the lifeblood
of your business.**

Move up a gear with FleetWave®

Your fleet takes you to new places. Opening up regional, national and global opportunities. And if it stops, everything stops.

Keep it moving with smarter fleet management. Use intelligent data to find out how your fleet works. Integrate almost any third-party app: from GPS and telematics to fuel cards and financial services, so you can work smarter. And automate your processes to work more efficiently. Our flexible software and services give you the tools to stay compliant, power-up productivity and exceed customer expectations. With us by your side, you'll be able to take your fleet – and your business – further.

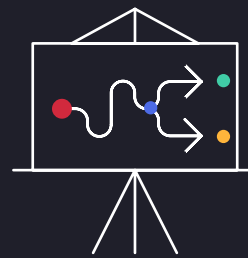

Maintain service quality

A simple way to monitor and manage drivers, vehicles, workshops and more.

Keep drivers safe

Keep up-to-date with driver checks and vehicle maintenance.

Boost productivity

Input and find the right information – fast – wherever you're working.

Work more efficiently

Know what's performing well and learn where you can make improvements.

Exceed expectations

Make sure you always deliver on your promises to customers.

1 Understand what's happening today, so you can plan wisely for tomorrow

Get actionable insights

Create and view analytics, predict trends and generate graphical reports in real-time. So you can make informed decisions, overcome challenges and act fast to seize opportunities.

Create bespoke reports

Make it easy for your people to get the details they need, with dashboards that can be tailored to the individual user, job role, departments and more.

Set up notifications

Stay organised, efficient and compliant with automated dashboard reminders every step of the way. From calendar alerts, to maintenance prompts and driver licence checks.

2 Become a more agile business, ready for change

Mobilise your team

Keep everyone connected
and informed on their
phones, laptops or tablets.
And put the information
they need in reach.

Get the right system

Our experts have built our
software and services to meet
the needs of every business
size and type. But there's
room for manoeuvre.

3 Handle your entire fleet with ease and efficiency

Centralised management

Monitor drivers, vehicles, workshops and more – from one place – giving you total visibility and greater control over your whole fleet and assets.

Accessible admin

Keep virtual paperwork in order: input and manage orders, capture and store relevant information and documents, such as contracts, photos, driver profiles and technical specs.

Shared access

Grant secure access to colleagues when you need to, so they can get information, record activities and upload documents that you can share, reducing the amount of admin you all need to do.

4 Analyse every element of your fleet and how they work together

Instant analysis

Use every asset more efficiently with real-time KPI tracking and analysis. This helps you see where you can rapidly reduce costs and get a return on investment. Plus, power-up your productivity and offer customers new services.

Supercharge scaling

Our system can keep up no matter how large your organisation grows. You can keep using our solution, even if you're managing multiple sites, workshops or regions. Or if you're in charge of several fleets, each with complex and diverse needs – it's a smart way to keep things simple.

Integrated systems

Our systems work with an ever growing directory of third-party apps: GPS and telematics to help track driver behaviour; fuel cards; financial services for easier accounting; parts and servicing to help monitor repairs, and a whole lot more.

All your fleet data in one place

Simplify your fleet operations by managing every part of your fleet, assets and workforce, from one central location – anywhere with an internet connection. So you can see how your fleet works. Spot where you can make improvements. And find ways to reduce costs.

With FleetWave, you can save...

2 hrs
administration per user per day

3%
total fleet size

5%
annual fuel spend

9%
vehicle downtime

12%
parking fines

16%
technician downtime

90%
paper documents and records

FleetWave Driver is a mobile app designed with fleet drivers in mind.

The intuitive interface helps to speed up and regulate your driver admin from anywhere, meaning you can:

Bridge the gap between drivers and the office

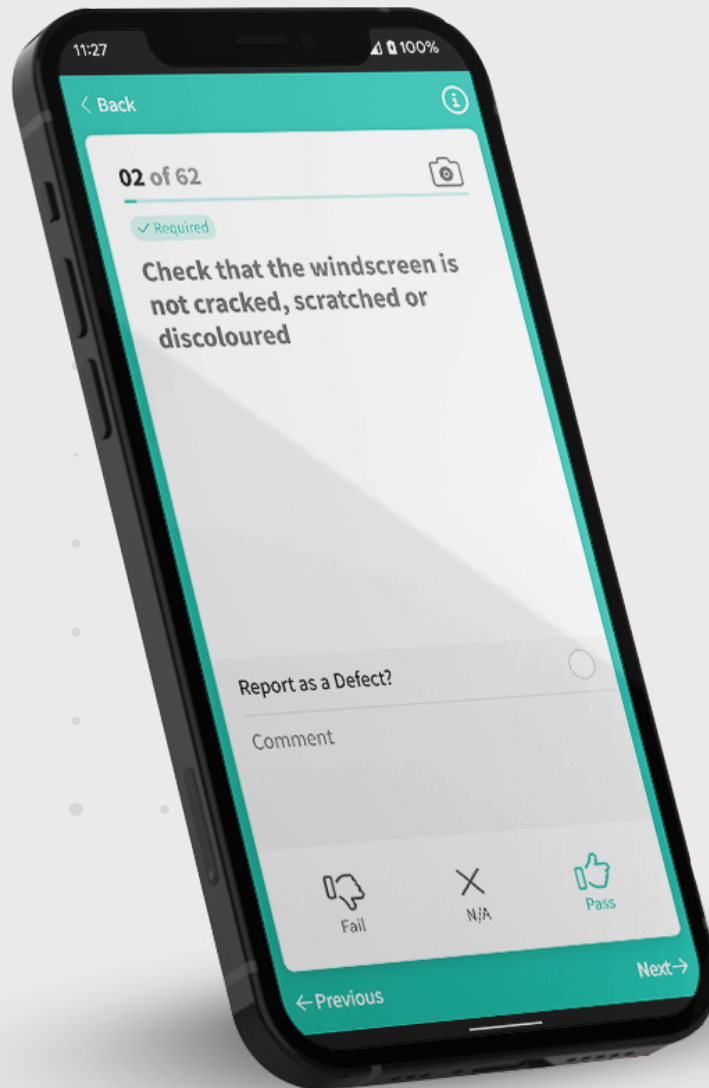

Ensure compliance with real time data capture

Eliminate paper forms and reduce costs

Additional key benefits include:

- Auditable driver and fleet compliance
- Barcode, photo and signature capture
- Daily walkaround vehicle checks
- Instant accident and fuel reporting
- Real time data capture
- Build custom forms to suit your operation with Driver - Advanced

FleetWave Technician is a mobile app designed with technicians and workshops in mind.

The intuitive interface helps to speed up and regulate your technician admin from anywhere, meaning you can:

Manage and allocate stock easily with barcode scanning

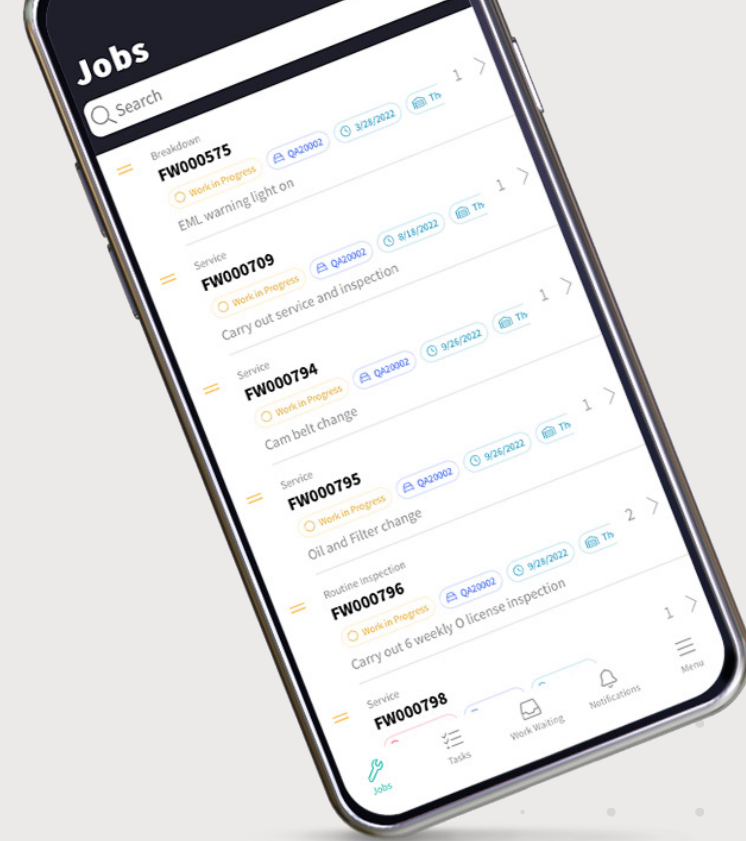

Work smarter with live work assignment for technicians

Save time and money with real time updates

Ensure auditable compliance with electronic check sheets

Additional key benefits include:

- Connect to your technicians with live push notifications
- Assist jobs and pick up work waiting
- Improve diagnostics with maintenance and repair history
- Full timesheet and productivity reporting
- Upload and access media for repairs
- Signature, barcode and image capture
- Ensure the planning and safety of your mobile workforce with GPS tracking

Editions

FleetWave Lite

Simplify your fleet data with clear dashboards and reports for compliance peace of mind.

- ✓ Vehicles
- ✓ Drivers
- ✓ Maintenance (Lite)
- ✓ Defects
- ✓ Fuel
- ✓ Accidents
- ✓ Fines
- ✓ Costings
- ✓ Account
- ✓ Reports

FleetWave Core

Customise your fleet management with advanced configuration and unlimited integrations.

All the features of **Lite**, plus:

- ✓ Assets/Equipment
- ✓ Rental/Vehicle Hire
- ✓ Maintenance (Full)
- ✓ KPI Wizard
- ✓ Custom Roles
- ✓ Branding Tool

FleetWave Advanced

Everything you need to manage even the most complex fleet.

All the features of **Core** plus:

- ✓ Vehicle Orders
- ✓ Pool Vehicles
- ✓ Workshop
- ✓ Stock/Inventory
- ✓ Check Sheet Builder
- ✓ [Workshop Mobile](#)
- ✓ [Forms](#)
- ✓ Advanced Reporting

See a full detailed list of features for each edition by visiting our [Pricing Page](#)

CASE STUDY

Helping Bidfood reduce parking fines by 20%

Smarter fleet management saves them £200,000 a year in penalties.

One of the UK's leading food service companies, Bidfood, has a complex commercial fleet. It had been working with four old databases that were struggling to cope with increasing demand. The team wanted one master database that brought together information from across the fleet, giving greater visibility and a better understanding of savings opportunities. In particular, they wanted to reduce the number of penalty charge notices (PCNs) they were receiving – around 1,000 each month.

We migrated the existing transport operation data from all four databases

to create one centrally-managed FleetWave system. And gave the finance department and individual depots access, so they could input depot-specific data and get the reports they needed.

We went on to develop a bespoke module to collate data about the PCNs. Which has helped the team spot PCN hotspots and trends, so they can take action to avoid charges and reduce costs. Reducing the number of fines by around 20%, saving the company up to £200,000 per year.

Powering up Central Hudson's productivity

New York energy supplier Central Hudson has seen an 8% boost in the number of repairs its engineers can make since adopting FleetWave. It's also been able to streamline its work-flow, saving them \$500,000 a year.

Initially, we built them a system that would give them more visibility and control over their fleet of 1,000 assets, which were spread over many sites. Since then, FleetWave has also been integrated with Central Hudson's financial platform and multiple fuel management systems. Helping them maximize equipment utilization as well as gain real-time insights into operating costs.

"Using FleetWave has helped us make better business decisions for all our stakeholders."

Michael Dooley,
Director, Supply Chain & Transportation, Central Hudson

Gaining control and reducing costs at DC Water

The District of Columbia Water & Sewer Authority, also known as DC Water, has been named one of the top 100 public sector fleets since adopting FleetWave.

Our tailored system helps them operate a complex fleet of 690 vehicles and associated equipment. This includes automating some manual processes – such as scheduling repairs and compiling reports. While giving them more control over their many sites, so they can better track costs and manage warehouse inventories.

This has helped DC Water cut turnaround times by 30%, downtime by 20% and boost technician productivity by 10%.

So despite growing demand, the authority is confident that it can successfully serve its community.

“Looking to the future, I see FleetWave playing a pivotal role in DC Water’s fleet success and I plan to harness the system’s capabilities further.”

Timothy Fitzgerald, Fleet Director,
District of Columbia Water and
Sewer Authority

Helping Pike Electric's fleet surge ahead

Utility provider, Pike Electric, is better connected thanks to FleetWave. It's people – including 20 mechanics across 8 shops and 40 field engineers – can now all access their shared data anywhere using their phones, laptops or tablets.

Where Pike Electric was previously using six different systems, our all-in-one cloud solution empowers team members by giving them the information they need instantly. While management has a better view of how their entire fleet – which includes 10,000 pieces of equipment – is being used. So they can make more informed decisions.

"The management information that FleetWave provides is much better, and its reporting function gives us the ability

to track the Key Process Indicators we need to make more effective decisions."

Travis Bruner, Director of Fleet Operations, Pike Electric

"FleetWave is very flexible and highly searchable, and easy to configure to meet our particular needs. All of those capabilities save time."

Richard Jackson, Fleet IT Specialist/
Business Analyst, Pike Electric

Why Chevin?

We're global leaders

We provide dedicated fleet management software to over 200 customers. And we manage over 1 million vehicles and assets across 180 countries.

We're ahead of the curve

We've been pioneering innovation for fleets since 1990. We developed the first web-based fleet system and continue to offer cutting-edge fleet technology to many different industry sectors.

Our solutions scale

We can tackle the most complex operations with support for multi-location, multi-level user access, definable workflows, and more.

Award-winning technology

We won the FleetNews Awards for Reader Recommended Software, Business Car Awards for Best Software and Transport Awards for Best Fleet Management Software Provider.

Be more sustainable

We are a carbon neutral organisation and you can do the same by removing paper processes. We'll show you how to embrace a sustainable future, while keeping up with the latest technologies.

Get team training

Our trainers are on call to help with anything, from inductions for new users to refresher courses, as well as more comprehensive training on or offsite.

Work with certified experts

We have the latest ISO accreditation for Information Security Management (ISO9001) & Quality Management Systems (ISO27001) standards.

Grow with the best

When you join our global community of fleet professionals, you get to share in the knowledge of some of the world's largest and complex fleets.
